4,845 YEARS
WORLD RECORD OF LONGEVITY
The Methuselah pine, as it
is called in France, is the
oldest tree known to
man. It is believed to be
over 5,000 years old,
although the exact age
is unknown due to the
radiocarbon dating
process.

DURABLE HEART
Evergreen trees, such as
pine, are known for their
durability. They can be
used in construction,
long-lasting furniture,
and other durable items.

WIDELY USED
Pine wood is used for
a variety of purposes,
including construction,
architectural woodworking,
and industrial applications.

CLASS 4
This classification
indicates the wood's
durability and suitability
for different applications.

LOCAL TIMBER
PAR EXCELLENCE

“THERE ARE UNDOUBTEDLY SOME GROWING NEAR YOU.”

GOOD TO KNOW
Many European countries
have their own unique
pine species, but the
most common is the Scots
Pine, which is well
adapted to temperate
climates.

MORE THAN 26%
OF TIMBER HARVESTED
IN FRANCE IS PINE
The Scotch Pine is the
most commonly
harvested tree in France,
making up over 26% of
the total timber harvest.

WOOD OF THE FUTURE
A SUCCESS FOR THE FUTURE
Pines are a vital part of the
future, providing wood
resources for centuries
to come.

HERE, THERE AND EVERYWHERE
Pines can be found in
many countries around
the globe, adapting to
various climates and
soils.

OUTDOOR LIVING
Professional horticulturists
are trained to apply
pine for outdoor
applications and
improve the environment.
